## CAKE TRANSPORTATION

Please keep your custom cake box on a flat surface to prevent the cake from sliding. If it is above 70°F, transport your cake with the AC on. Travel straight to your destination and let us know if your commute is over 30 mins. Please drive very carefully with your cake: no sudden stops, sharp or fast turns and be careful of any drastic changes in level such as traveling up or down steep hills or potholes.

## CAKE STORAGE

Refrigerate your cake inside the cake box until your event. Do not display your custom cake outdoors or for long periods of time if inside temperature is over 70°F.
